Specific Hazards Arising from the Chemical:

Keep containers/storage vessels in fire area cooled with water spray.
In case of fire, the following can be released:
Nitrogen oxides (NO_x)
Carbon monoxide

Special Protective Equipment and Precautions for Firefighters:

Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full-face piece operated in positive pressure mode.
Evacuate area of all unnecessary personnel and fight fire from a safe distance upwind.
Contain contaminated water/firefighting water; do not allow to enter drains or waterways. Foam or dry chemical fire extinguishing systems are preferred to prevent environmental damage from excessive water runoff.
