Microstar PMX is applied at sowing in contact with crop seeds

Microstar PMX contributes to faster crop emergence in a wide range of crops

## CROP RECOMMENDATIONS

Main crops	Rate (kg/ha)	Timing of application
Poppy and vegetables	30 to 60	Placement application at sowing with microgranule equipment or mixed with seeds (conventional drills). When mixing with seeds, thoroughly mix the microgranules with the seeds. Ensure constant mixing to retain a uniform mix.
Other crops that are direct seeded	20 to 60	

Refer to your agronomy advisor for suitable rates for your situation

**STORAGE:** Store in closed original container in a cool, dry, well-ventilated area out of direct sunlight. Store in a secure location away from children, animals and foodstuffs. Do not store with oxidising agents.

**WARNING:** Do not swallow. The dust from this product may act as an irritant. Avoid inhalation and contact with eyes and skin. This product contains heavy metal impurities. Its use may result in accumulation of cadmium in the soil. Depending on soil characteristics, irrigation water quality, plant species and variety, crop uptake of cadmium may lead to residue levels in plant and animal products in excess of the maximum level specified by the Australia New Zealand Food Standards Code. In pasture, the offal from grazing animals may also exceed these limits. Users are encouraged to seek further advice.
